Guiding Values + Principles

Grounded in health equity, trauma-informed care, and social determinants of health

Strategic by including upstream and downstream efforts so that we address the social determinants of health upstream while impacting clinical improvements downstream

Aligned with our local public health departments and health system partners to maximize impact

Guiding Values + Principles

Strengths-based: in order to lift up the assets and resiliency of the communities we serve

Adaptive and emergent: it is designed to respond to what we know, while also holding space to adapt to new information from communities throughout the duration of the plan

Structural Racism

Only when we acknowledge the harm caused by policies and practices, and actively create inclusive systems with communities of color that share power and center the expertise of the community, can we begin to interrupt institutional white dominance.

How?

Change how we invest and prioritize the distribution of resources, sharing power in decision-making and collaborative efforts, making intentional efforts to create policies and infrastructure that dismantle structural racism and creating systems that uplift marginalized and oppressed communities.
